Private Patients

Electrotherapy

at The Private Physiotherapy Clinic,
The Royal Free Hospital

Electrotherapy is one of the many techniques used at The Private Physiotherapy Clinic to relieve painful conditions such as:

- Back pain
- Neck pain
- Soft tissue injuries

Electrotherapy is a form of treatment that aims to promote healing, tissue repair and reduce pain with the use of electrical equipment.

The Chartered Physiotherapists at The Private Physiotherapy Clinic are all fully trained in the use of electrotherapy equipment including

- **Ultrasound:** A form of electrotherapy that uses high frequency sound waves to treat soft tissue injuries such as muscle and ligament sprains.
- **TENS** (Transcutaneous Electrical Nerve Stimulation): A form of electrotherapy that can provide pain relief by stimulating the nerves to stop sending pain signals to the brain and stimulating the release of endorphins
