

PSA & Treatment Log

Regular PSA blood tests are an important part of the follow-up of patients with prostate cancer. The results are a guide to how you are responding to treatment and help the doctor decide on the best treatment for you.

You should bring this log book with you whenever you visit your doctor or the Urology clinic to ensure the details and PSA test results are kept up to date.

Please remember to offer this log book to the clinic staff so that any new results or changes in treatment can be entered ensuring you have a complete record of your treatment and progress.
