

Royal Free London - Private Patients Unit

About Royal Free London - Private Patients Unit

The Royal Free London – Private Patients Unit has a rich history and was established in the 1980’s. The unit has always been based on the 12th floor of the Royal Free Hospital in Hampstead. PPU began with one ward which covered a range of specialties including hematology, orthopaedics, gastroenterology, neurosurgery, neurology, hepatology, urology, general surgery and vascular surgery.

PPU’s wards now known as 12 north, 12 east B, 12 south and 12 west were previously known as:

- 12 North – Victoria Ward
- 12EB – Calthorpe Ward
- 12 South - Jenner Hospkins Ward
- 12 West – Gloucester Ward

Now, PPU has a comprehensive clinical service offering across our dedicated private facilities at the Royal Free Hospital. These include:

- 12 South - 16 beds
- 12 West - 15 beds (8 monitored beds)
- 12 North - 7 beds (2 monitored beds)
- 12 East B -9 beds (shared utilisation)
- 2 hot rooms in 12 East B
- HDU Beds (shared utilisation)
- ICU Beds (shared utilisation)
- 2 Paediatrics Beds on 6 North
- 2 Theatres
- 1 Angiography Suite (shared utilisation)
- 1 Cardiac Catheter Lab (shared utilisation)
- 1 Endoscopy Theatre (shared utilisation)
- 7 Dialysis Chairs
- 5 Chemotherapy Chairs
- 8 Consulting Rooms
- Level 2 & 3 Care

For almost forty years, PPU has evolved and has a rich history of reinvesting back into the NHS. The Private Patients Unit is wholly owned by the Royal Free London NHS Foundation Trust and the surplus funds that it earns are all ploughed back into the trust’s hospitals - not given to external shareholders who retain patients’ money within.

Generated revenue has been able to support:

- the joint purchase of the hospital’s surgical robot
- expansion of the Royal Free intensive care unit
- a cafe facility for operating theatres staff
- c.£500,000 per annum of donations into the Royal Free Charity
- a substantial element of the annual medical equipment budget for the hospital
- dozens of nursing posts on the NHS that would otherwise be lost.

We can do this and still provide a high quality service because one of the best, and most cost effective, places in the world to run a high quality clinical service is surrounded by the specialist facilities, workforce, and backup support of a major London teaching hospital such as the Royal Free.

All consultants working in PPU are employed by the Royal Free London NHS Foundation Trust and are based at either the Royal Free Hospital or Barnet Hospital for their NHS work.

In addition to PPU’s facilities at the Royal Free Hospital, we also have a day surgery site in Barnet called Hadley Wood Hospital. Our clinical facilities at Hadley Wood Hospital include:

- 2 Theatres
- 1 Endoscopy Room
- 10 Beds
- 1 Minor Ops Room
- 6 Consulting Rooms
- CT, MRI, X-ray and Ultrasound.

We look forward to working with you.

Kind regards

Professor George Hamilton
